PERSONAL PROTECTION

## MACE PEPPERGARD® MODELS:

Pocket, Personal and Police Size available.

PepperGard® has a powerful Oleoresin Capsicum (OC) pepper formula that creates an intense burning sensation and causes an attacker's eyes to slam shut upon direct contact. OC pepper is a naturally occurring substance derived from cayenne peppers.

## MACE PEPPER GEL® RANGE

Mace pepper spray is the most recognized personal security product in the industry. The newest Mace personal defense spray is a 1.4% capsaicinoid concentration suspended in a sticky gel, rather than the liquid of the regular Mace pepper spray. The gel can spray up to 25 feet and because the gel formula sticks like glue to the face of an assailant, it is less contaminating to the surrounding area, making it ideal for indoor use.

Mace PepperGel is hotter than many other pepper sprays on the market but is non-toxic and causes only temporary discomfort. Contains UV dye to invisibly mark an assailant for possible identification.

## MACE PEPPER GEL®- LARGE PRODUCT CODE V80269 120GM

The Pepper Gel Large is 45 grams of Pepper Gel and UV Dye. It has a spray range of up to 18 feet. The canister contains up to 20 bursts. As with all other Pepper Gel products, this product is ideal for indoor use.

## MACE 10% PEPPER GEL® HOME DEFENCE PRODUCT CODE V9010

Mace 10% Pepper Gel® Home Defence is ideal for home protection and auto defence.

It remains effective for up to three years. The canister contains 330 grams, empties in six seconds and sprays up to 25 feet. The pistol grip dispenser with safety pin prevents accidental discharge.

PERSONAL PROTECTION

## MACE TRIPLE ACTION® MODELS:

The active ingredients in the Triple Action formula are a careful blend of Oleoresin Capsicum (OC) and tear gas. The OC Pepper causes the eyes to slam shut and uncontrollable choking. The tear gas causes profuse tearing and disorientation. The combination of the two agents produces a powerful self defense spray making this pepper spray model a good choice for an everyday personal defense product. This Mace pepper spray formula also contains UV dye to invisibly mark an assailant which may aid in identification.
